

## **PUAFER001 - IDENTIFY, PREVENT AND REPORT POTENTIAL FACILITY EMERGENCY SITUATIONS**

This course applies to a broad range of emergencies and covers the work required before emergency services and/or specialist response team arrives (not including the specific use of equipment to prevent facility emergency situations).

It will provide the skills and knowledge and most importantly the confidence needed by occupants who are required to be 'emergency aware' in their facility. Allowing them to identify and where possible prevent the development of facility emergency situations. Participants will also learn how to minimise the consequences of an emergency and to report if emergency protection systems and/or equipment is compromised.

Specifically, this will include communicating with team members and stakeholders, identifying and reporting situations in a facility that reduce the effectiveness of emergency protection systems and equipment, identifying emergency protection systems and equipment present in a facility and identifying, monitoring and reporting situations that could lead to emergencies in a facility.

All aspects of this course are undertaken in accordance with legislative requirements, organisational policies and procedures and approved safe practices. Facilities are those as specified in Australian Standard 3745 and AS 4083 and are a building, structure or workplace that is, or may be, occupied by people (occupants).

### Units Delivered

The following units will be included in your certificate:

- PUAFER001 - Identify, prevent and report potential facility emergency situations

### Course Delivery

This course can be delivered/assessed in the workplace or at facility organised by the training provider.

### Course Durations

Course durations can vary for multiple reasons, so the durations below are the minimum possible amount.

- Face-to-Face Face to Face contact time of at least 3 Hours

### Entry Requirements

Participants must have the physical capacity to complete all practical demonstrations. This includes conducting routine checks and using communications equipment.

### Assessment Requirements

Individuals undertaking this course will be expected to complete both written and practical assessment tasks.

# PUAFER001 - IDENTIFY, PREVENT AND REPORT POTENTIAL FACILITY EMERGENCY SITUATIONS

## Certificate Renewal Requirements

- This certificate does not require renewal

## Learner Rights, Responsibilities & Support

Please note that enrolment to this course is made with Allens Training Pty Ltd RTO 90909. Please refer to the [student handbook](#) for all details relating to rights and responsibilities including complaints and appeals.

## Assessment Activities

- Performance tasks - Identify emergency protection systems and equipment
- Documentation - Completion of a Workplace emergency checklist
- Case Study - Hazardous work

## Theory assessment

A written assessment consisting of short-answer and multiple-choice questions. The student must successfully complete all assessment questions
